

Dear Administrators and Faculty,

UNICEF is an organization involved in raising advocacy and awareness about issues dealing with children at a global level. Subjects of concern include girls' education, immunization and child protection. KUUNICEF is a branch of the larger group, located on the University's campus under the direction of our faculty advisor, Joe Potts. The group works to raise awareness throughout the Lawrence community. We, as an organization, feel that it is important to begin understanding the disparities and differences throughout the world at an early age. Children are such a great asset and resource and by giving them a sense of awareness, we are providing them with the opportunity to have a voice.

In order to create such awareness, **KUUNICEF** is hosting **WORLD CHILDREN'S DAY**, a **FREE** event in **South Park** on **April 23**, from **1-5 pm**. We will be using age appropriate games and activities to teach children about global issues. The event will be geared towards elementary aged children. Parents are strongly encouraged to attend. Thank you, we can't wait to see everyone there!

If you need to contact us for any reason, please email our president, Carlos Centeno at cluster@ku.edu.

Thank you for your interest,

The members of KUUNICEF
